BLOCKBUSTERx
BODY & BRAIN
TOXIN & PLAQUE
REMOVER

Scientifically developed EDTA to cleanse toxins and toxic plaque from the *Inside, Out*™

TO MAXIMIZE BLOCKBUSTER-X THERAPY (formerly CardioPureRx)

DIRECTIONS FOR USE

TAKE 1/4 TEASPOON PER DAY MIXED WITH 6 OZ OF WATER ONCE DAILY, FOR 21 CONSECUTIVE DAYS. THEN TAKE 7 DAYS OFF. AFTER THIS 7 DAY PERIOD, BEGIN TAKING CARDIOPURE AGAIN FOR ANOTHER 21 DAY CYCLE. WHEN TAKEN OVER A LIFETIME, EDTA IS CONSIDERED TO BE ONE OF THE MOST BENEFICIAL PRODUCTS FOR HUMAN HEALTH.

Since toxic materials accumulate daily, we recommend that you continue with this 21 days on, 7 days off cycle for life. Most people see results within 60 days. We recommend taking BlockBusterX at night, where one will normally go six-to eight hours without food.

We advise caution if you are currently toxic, weak, ill or have sensitivities to medications and/or vitamins. Please consult with your healthcare practitioner before using BlockBusterX. BlockBusterX EDTA itself is quite safe. However some heavy metal detox symptoms are normal and to be expected at first.

Moderate to heavy metal detox symptoms can include, but are not limited to lethargy, headaches, dizziness, muscle/joint aches, skin Irritation, loss of appetite, stomach upset, nausea, vomiting and/or a drop in *calcium. If you experience extreme heavy metal detox symptoms, it is important to stop BlockBusterX immediately. Always increase your amount of water, fresh greens, vitamin C, B12, folic acid and other supplements.

Should you experience detox symptoms, instead of the initial recommended dose, we recommend taking lower daily doses of BlockBusterX and then gradually work your way up over a longer time. Since a little BlockBusterX over time is much better than a lot at once, we always recommend that you under-dose and intuitively work your way up to 1/4 teaspoon per day.

VERY IMPORTANT: *Take Mineral Matrix Rx (colloidal minerals) during the one-week waiting period. Also, if you experience leg cramping, this means your calcium levels are getting low. For three days, stop taking the BlockBusterX while you immediately take a colloidal mineral supplement such as Mineral Matrix Rx for three days, then resume BlockBusterX.

We also encourage that you take supplemental vitamins, minerals and amino acids, and that you drink a lot of water each day to flush out toxins as fast as possible (1/2 oz. water minimum for every pound you weigh).

We believe that BlockBusterX is something that you should take for the rest of your life to thrive. The recommended daily dose of BlockBusterX can bind to any new environmental impurities and food toxins, and can help keep your cardiovascular system clean and healthy as it slowly removes decades of toxins and plaque.

It is far more practical and safe to take a daily, low dose, lifetime approach to chelating, arresting oxidative stress and living with pristine cardiovascular health versus a random and expensive *high dose intravenous treatment*. To genuinely make a difference from the aggregate damage caused by free radical, environmental, chromosomal (and) hormonal decline, stress and other factors that occur over forty to fifty years or longer on our wonderfully resilient body and brain, does require commitment and patience. Please understand that you need to allow up to six months to fully experience best results.
