

Indications and usage:

Omega Rx™ offers natural Omega 3-6-9 Essential Fatty Acids (EFA's) and essential lipids, plus phytosterols and antioxidants. A deficiency of certain fats leads to **cardiovascular, neurological and skin disorders**. Lipids (fats) are the primary structural components of all cell walls and membranes, while also composing some 50% of the dry weight of the **brain**. Since the **continuous demand** for these important lipids (as a result of **cellular regeneration**) isn't being met by today's "low-fat", over-processed and hydrogenated fat-filled diets, supplementation of "healthy fats" is more vital than ever. Additionally, an **increase** in eating hydrogenated fats ("trans-fats") causes a **decrease** in body pH levels, resulting in a more **acidic blood plasma**, which subsequently creates an environment that is a catalyst for **cholesterol plaque buildup, heart disease and cancer**. EFAs are essential biological substances of our body, and without them in required supply, we **prematurely age** and are more prone to sickness and disease. **Without EFA's and essential lipids, we will look 10 - 20 years older than we should.**

Dosage and administration: As a dietary supplement for adults, take three (3) capsules daily with or between meals, or as recommended by your healthcare Professional. For best results, please follow a healthy diet, exercise and lifestyle program. **KEEP OUT OF REACH OF CHILDREN**

OMEGA-V Rx™

Complete Essential Omega 3-6-9 Fatty Acid & Lipid Complex

AntiAging•Research•Laboratories

Action and Clinical Nutricology

- Improve heart and circulatory function
- Optimize brain neurotransmitters
- Reduce arthritis pain and inflammation
- Strengthen cardiovascular cell wall integrity
- Produce supple, moist skin
- Help with Weight/Fat control and Diabetes
- Rebuild the Liver, remove atherosclerotic plaque
- Strengthen the immune system
- Reduce allergy symptoms
- Help against premature aging

500 mg/pc
90 capsules

Dietary Supplement

Due to modern food processing, today's Western diet contains only 1/6th of the Omega-3 essential fatty acids commonly found in healthy 19th century diets.

Omega Rx™ is a Scientific Formulation of natural ingredients including:

Essential Fatty Acids: Serving as precursors to prostaglandins and other eicosanoids that affect cardiovascular health (blood aggregation, vasodilation and vasoconstriction) and are essential for the development and function of the brain, heart & kidneys.

Phytosterols and Lignans: Naturally occurring sterols that enhance the growth and regeneration of cells and provide strong anti-cancer properties.

Antioxidant Complex: Antioxidants proven effective in restoring small capillary health throughout the body and the brain, allowing increased circulation and oxygen transport, as well as protection for improved eyesight.

Specifically Targeted Micronutrients: Helps the body's ability to strengthen and regenerate cellular membrane structures, helping to protect against metabolic and environmental toxins.
